Montes Taurus Journal of Pure and Applied Mathematics

ISSN: 2687-4814 | **Period:** (At least) 2 issues per year | **Founded in:** 2019

- The Montes Taurus Journal of Pure and Applied Mathematics (MTJPAM) features selected research articles that represent the broad spectrum of interest in contemporary Pure and Applied Mathematics, Statistics and allied areas such as Engineering, Computer Science, Physics and Mathematical Physics, Economics, Mathematical Philosophy and Logic, and also other related areas. A valuable resource for mathematicians, statistics and allied areas such as Engineering, Computer Science, Physics and Mathematical Physics, Economics, Mathematical Philosophy and Logic, and also other related areas, the journal provides an international forum for the publication of original research in these fields. In addition to the research articles, the Montes Taurus Journal of Pure and Applied Mathematics (MTJPAM) can also publish proceedings of scientific conferences (also symposiums, workshops, or meetings).

- The Montes Taurus Journal of Pure and Applied Mathematics (MTJPAM) is encouraging submissions of quality, long articles where most or all of the technical details are included. The journal now considers and welcomes also papers are interested in Pure and Applied Mathematics and allied areas.

- The Montes Taurus Journal of Pure and Applied Mathematics (MTJPAM) is a ***single-blind refereed journal***. The abbreviation of this journal is ***Montes Taurus J. Pure Appl. Math.*** The Montes Taurus Journal of Pure and Applied Mathematics (MTJPAM) is published at least twice a year and also ***this journal is free of charge***. The Montes Taurus Journal of Pure and Applied Mathematics (MTJPAM) publishes the articles in **English**.

- **Inspiration of name of journal:** The name of this journal comes from the famous mountains called "Taurus Mountains" which is composed of a combination of sequential mountains surround the Mediterranean region of Turkey. It is well-known that "Montes Taurus" is also an irregularly nested and extremely complex region on the moon surface. The Montes Taurus were so-called after Taurus Mountains which lie down as parallel to Mediterranean Sea.

- **Inspiration and meaning of the logo of the "Montes Taurus Journal of Pure and Applied Mathematics (ISSN: 2687-4814)":** Since Montes Taurus is the name of the mountains and a region on the moon, the moon at the top of the mountains symbolized in the journal's logo. On the other hand, the mountains where the moon raises symbolizes the Taurus mountains surrounding Turkey's southern (Mediterranean region) like a castle. The curves in the letters (especially the folds in the letters M, T, J, P and A) represent the horns of the mountain goats, the world's most innocent and nature-defying animals living in the Taurus Mountains. The Taurus Mountains have generously served mythology, civilization, humanity and all living things in every period. Fertile Taurus Mountains hosted many famous writers, poets and scientists in every stage of scientific progress in the world and will continue to do so forever. For this reason, our journal named as "Montes Taurus Journal of Pure and Applied Mathematics" will unite all scientists in the world as the Taurus Mountains did and "keep serving humanity" forever without compromising its scientific line.
