

Foreword written by Professor Yilmaz Simsek

The establishment of scientific traditions in people's dreams and their spread for the benefit of humanity have been possible outside of universities only through scientific research journals and scientific research periodicals, as well as symposiums, conferences and workshops, etc. In addition to these, the publication of papers presented at conferences and symposiums in special issues of scientific periodicals provides great services to the establishment of scientific culture. When we look at the historical development of our scientific culture, special issues published in scientific journals are published both to commemorate the scientific work of researchers specialized in certain subjects, and to celebrate the birthdays of these researchers. This also provides a very respectable scientific tradition. On this occasion, it is a great pleasure for me to write the Foreword of this Special Dedication Issue published by *Montes Taurus Journal of Pure and Applied Mathematics (MTJPAM)* organized by the Special Issue Editors Prof. Dr. Abdelmejid Bayad, Prof. Dr. Mustafa Alkan, Assoc. Prof. Dr. İrem Küçüköğlü and Assoc. Prof. Dr. Ortaş Öneş dedicated to my 60th birthday. This special issue is also my most precious gift and a great source of honor. It also makes me very happy and proud to see so many scientists from almost every continent of the world contributing to the success of this Special Dedication Issue with their high quality and noteworthy articles.

First of all, I would like to express my sincere gratitude to the Special Issue Editors who are the source of the extraordinary success of this Special Dedication Issue. In addition to these, I would like to thank and express my gratitude to the Editorial Board Members of the *Montes Taurus Journal of Pure and Applied Mathematics (MTJPAM)*. Again, I would like to express my special thanks to all the esteemed participating authors who have contributed to the extraordinary success of this Special Dedication Issue with their invaluable and high-quality articles. I am very happy and honored to thank all the anonymous hero referees for their criticisms, comments and contributions in preparing the published articles for publication almost without error in this Special Dedication Issue.

This Special Dedication Issue was also made possible with the support and contributions of the participants of “The 13th Symposium on Generating Functions of Special Numbers and Polynomials and their Applications (GF-SNP 2023), which is dedicated to Professor Yilmaz SIMSEK on the Occasion of his 60th Anniversary, held at Sherwood Exclusive Lara Hotel in Antalya, TURKEY on February 17–18, 2023; <https://gfsnpsymposia.com>” and “The 6th Mediterranean International Conference of Pure & Applied Mathematics and Related Areas (MICOPAM 2023), which is dedicated to Professor Yilmaz SIMSEK on the Occasion of his 60th Anniversary, held at Université d'Evry Val d'Essonne in Paris, FRANCE on August 23–27, 2023, <https://micopam.com>”. Therefore, I would also like to express my sincere gratitude to the participants.

Finally, I would like to emphasize that my deepest and most sincere Special Thanks belong to each of the Special Issue Editors: “Prof. Dr. Abdelmejid Bayad, Prof. Dr. Mustafa Alkan, Assoc. Prof. Dr. İrem Küçüköğlü and

Assoc. Prof. Dr. Ortaş Öneş". In addition, I would also like to express my deepest gratitude and appreciation to MTJPAM's Publishing Editor (Irem Kucukoglu), Layout Editor (Neslihan Kilar), Editorial Secretaries (Damla Gun, Elif Sukruoglu and Ezgi Polat), and all my colleagues in the Editorial Office for their dedicated, timeless, efficient editorial assistance and support.

I will never forget all the authors who contributed to this unique dedication special issue, which gave meaning to my scientific life. This Special Dedication Issue will also provide a scientific tradition to young scientists who will serve with scientific academic traditions after me.

Professor Yilmaz Simsek
